

Northbridge Community Alliance Strategic Plan 2025–2028

Executive Summary

I. Mission

Northbridge Community Alliance strengthens neighborhoods by improving access to essential resources, expanding opportunity, and advancing community-informed solutions to local challenges. We work alongside residents, partners, and public institutions to address barriers related to food access, educational opportunity, volunteer engagement, and neighborhood well-being.

Northbridge is a nonpartisan nonprofit organization and does not endorse political candidates. Our advocacy efforts are grounded in documented community needs and organizational evidence.

II. Vision

We envision communities where all residents have reliable access to nutritious food, high-quality educational support, and opportunities to contribute meaningfully to neighborhood life. Northbridge seeks to build resilient local systems that reduce disparities and strengthen civic participation.

III. Strategic Priorities (2025–2028)

Priority 1: Improve Food Access and Nutrition Equity

Northbridge will expand access to nutritious food through partnerships, direct service programs, and policy engagement that addresses structural barriers to food security.

Objectives:

- Increase the number of households served annually by 20% by 2028.
- Expand culturally responsive food distribution options in at least three target neighborhoods.
- Strengthen partnerships with at least five local schools and faith-based organizations to improve referral coordination.
- Contribute data and community insights to local food policy discussions.

Guiding Principle:

Northbridge supports policies and initiatives that increase food affordability, improve supply chain reliability, and reduce geographic disparities in food access.

Priority 2: Expand Educational and Youth Support Programs

Northbridge will strengthen academic support programs and youth mentorship initiatives, focusing on neighborhoods with documented educational gaps.

Objectives:

- Increase tutoring participation by 15% across middle school programs.
- Improve volunteer retention in youth-facing roles by 10%.
- Develop two new school-based partnerships in underserved areas.
- Share annual evaluation findings with community stakeholders.

Northbridge recognizes that educational outcomes are influenced by multiple factors. Our programs aim to provide supplemental academic support and enrichment opportunities, not replace formal school systems.

Priority 3: Strengthen Volunteer Engagement and Community Participation

Volunteers are central to Northbridge's impact. We will improve volunteer coordination systems, training quality, and capacity alignment across programs.

Objectives:

- Reduce volunteer scheduling gaps by 25%.
- Increase certification completion rates for youth-facing and food safety roles.
- Launch quarterly volunteer engagement surveys to assess satisfaction and barriers.

Northbridge values transparent volunteer placement processes and clear communication about program needs and requirements.

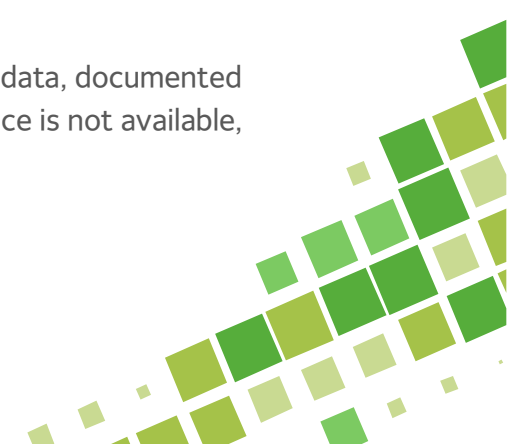

Priority 4: Advance Data-Informed Advocacy and Community Voice

Northbridge will elevate documented community needs and program insights in local policy conversations while maintaining nonpartisan integrity.

Objectives:

- Publish at least two policy briefs annually grounded in internal program data and community feedback.
- Provide written testimony or briefing materials for local policy discussions when aligned with mission priorities.
- Develop a standardized evidence review process for all public-facing policy materials.

Northbridge's advocacy positions are informed by internal program data, documented community needs, and established research. When sufficient evidence is not available, the organization will refrain from making unsupported claims.

IV. Target Neighborhood Focus Areas

During the 2025–2028 strategic cycle, Northbridge will prioritize efforts in:

- Eastview – Focus on food access and youth tutoring expansion
- Riverbend – Emphasis on volunteer recruitment and distribution partnerships
- Westside – Integrated approach to food access and community engagement

Neighborhood prioritization is based on documented program demand and community feedback collected during the 2024 planning cycle.

V. Evidence and Accountability

Northbridge is committed to transparency and evidence-informed practice. Public statements, policy briefs, and advocacy materials should align with documented findings from:

- Annual Program Evaluation Reports
- Community Needs Assessments
- Strategic Planning Sessions
- Volunteer Engagement Surveys

The organization does not claim causal impact unless supported by documented evaluation methods. When referencing statistics or outcomes, materials should identify the source document.

VI. Topics Outside Current Strategic Scope

The 2025–2028 strategic plan does not establish formal positions on:

- Statewide tax policy reform
- National immigration policy
- Environmental climate legislation
- Partisan electoral issues

Northbridge may engage in these areas only if directly connected to documented programmatic impact and approved by the Board.

VII. Implementation and Review

Progress toward strategic objectives will be reviewed annually by senior leadership and the Board of Directors. Adjustments may be made based on documented community needs, funding changes, or evaluation findings.

A mid-cycle strategic review will occur in 2026 to assess measurable progress and recalibrate priorities if necessary.
